

Living with LUBANN: Care & Warranty

The Living Wood

Alder continues to adjust to climate conditions over its lifespan. Slight shrinking, swelling, panel movement, or small hairline cracks are natural aging processes, not manufacturing defects.

Maintenance

Prolong the life of your door by using wax polish or following your specific paint/stain manufacturer's maintenance procedures.

The Warranty

Backed by a 1-Year Limited Warranty against manufacturing defects. (Note: Warp $\leq 1/4$ " for doors 3'x7' or smaller is not considered a defect. Warranty is strictly subject to proper climate storage and the 48-hour 6-sided sealing requirement).
